EXAMINER'S COMMENTS

4. The Oath filed on November 10, 2004 has been received and entered.

REASONS FOR ALLOWANCE

Art Unit: 1653

5. The following is an Examiner's statement of reasons for allowance:

The applicant has claimed an isolated DNA molecule encoding INGAP, wherein INGAP has the amino acid sequence shown in SEQ ID NO:2. Applicant's arguments filed on June 25, 2004 over came the rejection of record. Noting that the instant application and copending application 09/659,379 are not obvious over each other because the sequence recited in claim 1 of the copending application excludes the signal sequence. Upon due reconsideration it was noted that although the copending claim 1 recites the open language "comprising" in association with "residues 27 to 175", the copending application claim 1 has a negative proviso which excludes residues 1 to 26. Thus, the structures in the two applications are not an obvious variation of each other. In addition, a search of commercial databases did not produce any prior art that suggests or teaches the above claimed invention. Thus, the claimed invention is novel and nonobvious over the prior art.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
